INTRODUCTION

This report covers the calendar year 1985 and complements the report entitled Alberta's Agriculture Exports 1985, Country by Commodity. While the first report covered exports from the province by country, this report covers exports from the province by commodity. The level of commodity disaggregation provided in this report is greater than the previous report. Because categories are not identical for both publications, there are minor differences in total export values between them. Estimates of quantities and values of exports for Alberta, Western Canada and Canada are included.

SOURCES AND METHODS

The primary sources of data for out-of-country exports were Statistics Canada Catalogues 65-003 (Exports by Countries) and 65-004 (Exports by Commodities), supplemented with provincial level information from the Alberta Bureau of Statistics and other Statistics Canada publications.

A number of adjustments and revisions were made to Statistics Canada's exports by province of lading data to arrive at estimated Alberta exports as reported in this publication. These adjustments were necessary to overcome inadequacies in the province of lading concept which, in many cases, does not provide export information by province of origin. This is especially true for exports of grain and oilseeds where a landlocked province such as Alberta has its exports grossly underestimated. The information necessary to adjust Statistics Canada data for Alberta exports was gathered from many sources within Alberta Agriculture, other government departments and industry.

In particular, the figures reported for grains and oilseeds and their products have been adjusted to reflect provincial production statistics and actual shipments for the calendar year 1985.

OUT-OF-COUNTRY-EXPORTS

Highlights

The value of out-of-country exports of primary and processed agricultural products in 1985 was $1,753 million or 56 per cent of out-of-province shipments. This represented a decline over 1984 which saw out-of-country exports of $2,291 million or 57 per cent of out-of-province shipments.

The corresponding out-of-country export value for Canadian exports was $9,569 million, a 13 per cent decline over the previous year's value of $10,987 million. Alberta accounted for approximately 18 per cent of total Canadian agricultural exports, down from about 21 per cent in 1984.

Wheat exports, valued at $822 million continue to be the major agricultural export earner for the province accounting for over 47 per cent of export revenues. This is a significant decline over 1984 which saw wheat exports valued at $1,159 million or over 50 per cent of total export value.

Canola and canola products accounted for $225 million or 14.5 per cent of export earnings. This was a substantial drop from $390 million or 17 per cent of export earnings in 1984.

Alberta barley exports represented 7 per cent of agricultural exports contributing over $123

million dollars to export earnings. Again, this was a substantial decrease over 1984.

Lower production and depleted stocks rather than dwindling export markets were contributing factors to the decrease in export earnings from grains and oilseeds in 1985.

Live animal exports from Alberta (principally cattle & hogs) were over $106 million dollars. This was below the 1984 record value of $138 million but well above the $78 million for 1983. Shipments of live hogs and cattle to the U.S.A. continued to be responsible for this higher than average value.

Meats and meat preparations showed a substantial increase over the previous year. In 1984, the value of meats and meat preparations exported was $91 million or 4 per cent of total export earnings. In 1985 this value increased to over $143 million or 8 per cent of total export earnings. Increases in exports of meat and meat preparations more than offset the decline in exports of live animals. Together live animals, meats and meat preparations contributed $250 million to export earnings. This represented a 9 per cent increase over the $229 million total for the previous year.

Canola oil and meal also showed increases in export values in 1985. The 1985 value was approximately $136 million, up from $125 million in 1984, and substantially higher than the $39 million in 1983.

Honey exports were $6.5 million, down from $8.5 million in 1984 but well above the $3.7 million mark in 1983.

Other important Alberta agricultural exports in 1985 were cattle hides, whiskey, malt and peat moss.

TRADING PARTNER ANALYSIS

In 1985, Alberta's most important export markets were Japan, U.S.A., People's Republic of China, U.S.S.R., Brazil, India, Egypt, and Algeria. Together, these eight nations purchased an estimated 80 per cent of Alberta's agricultural exports.

JAPAN

Japan, Alberta's largest customer for agricultural exports, purchased an estimated $380 million for 1985, down from $461 million in 1984 and $410 million in 1983. Japan continued to be the largest importer of canola from Alberta. She imported $195 million of canola in 1985, down only slightly from the $198 million in 1984 but well ahead of the $161 million in 1983.

Japan has been a major market for Alberta wheat and barley. While barley exports to Japan remained relatively stable in 1985, wheat exports declined considerably. Meat exports to Japan also dropped off in 1985 to $15 million from $18 million in 1984.

Japan is also a reliable market for canola oil and meal, dehydrated alfalfa and barley malt.

U.S.A.

The U.S.A. continued to be a major market for Alberta agricultural exports in 1985. Exports were $346 million, up substantially from $301 million in 1984. The increase in the export total to the U.S.A. was due mainly to increases in the shipments of meat and animal products. Meat, fresh, chilled or frozen increased from $56 million in 1984 to $110 million in 1985 to become the largest export category to the U.S.A., surpassing live animals.

Other agricultural commodities that enjoyed

success in the U.S. market in 1985 were honey, whiskey, cattle hides, peat moss and canola oil and meal. Since the granting of GRAS status (generally regarded as safe) to canola by the U.S. Food and Drug Administration in 1984, sales of canola oil and products to the U.S.A. have gradually improved.

Strength in the American economy combined with the declining value of the American dollar vis-a-vis European currencies and the Japanese Yen, as well as the possibilities for more accommodative trade arrangements between Canada and the U.S.A. bode well for continued export increases between Alberta and the U.S.A.

PEOPLE'S REPUBLIC OF CHINA

Alberta exports to the People's Republic of China increased to $221 million in 1985 from $166 million in 1984. This increase is due almost entirely to China's importation of lower grade wheats and the availability of these wheats in Alberta in 1985. China did not import barley from Alberta in 1985.

China may continue to import lower quality grains in substantial amounts but volumes may be sporadic. Because she is at or near a level of self-sufficiency in grain production, imports of lower quality feed grains may be dependent on her ability to export higher value cereals for human consumption.

U.S.S.R.

The U.S.S.R. imported less Alberta wheat in 1985 because of her propensity to demand top quality, hard red, spring wheats. This, along with Alberta's lower-quality stocks, combined to decrease Alberta exports for wheat to the U.S.S.R. to an estimated $197 million in 1985 from $472 million the previous year. Alberta barley exports to the U.S.S.R. also declined significantly in 1985.

UNITED KINGDOM

The United Kingdom, traditionally a major market for western Canadian grains, continued to decline in importance as an export market for Alberta agricultural products. In 1985, the estimated total exports of these products to the U.K. was $27.5 million, down from $53 million in 1984 and $65 million in 1983. The U.K. imports only high quality, hard red spring wheat to mix with their domestic soft wheats so we may expect this market to improve somewhat in 1986, depending on the availability of high quality wheat stocks in Alberta.

E.E.C. AND OTHER WESTERN EUROPE (excluding U.K.)

Exports to continental Western Europe also declined dramatically in 1985 to $59 million from $161 million in 1984. The bulk of the decrease was due to declining imports of wheat and barley.

EASTERN EUROPE (excluding U.S.S.R.)

Agricultural exports to Eastern Europe declined from $81 million in 1984 to $4 million in 1985. The decrease resulted mainly from a large reduction in barley exports to East Germany. Eastern Europe continues to decline as an important consumer of Alberta agricultural products.

MIDDLE EAST (excluding African Nations)

Exports to the Middle East consist almost exclusively of wheat, wheat flour, and barley. In 1985 an estimated $57 million of agricultural commodities was exported to this region, down significantly from $128 million in 1984.

AFRICA

Alberta export trade with African nations

amounted to $121 million in 1985, up from $110 million in 1984. The majority of exports are made up of wheat and wheat flour. Algeria and Egypt continue to be significant customers for Alberta wheat.

ASIA - PACIFIC (excluding Japan and PRC)

Exports to countries in this region other than Japan and the People's Republic of China, were estimated at $135 million for 1985. This is below the 1984 figure of $164 million but ahead of the 1983 estimate of $114 million. Most of the decrease came in the grains and oilseeds sector. Of interest however, is that India continues to increase her imports of Alberta canola oil. In 1985 India imported $61 million of canola oil compared to $43 million in 1984 and $9 million in 1983.

SOUTH AMERICA

Exports from Alberta to South American nations declined to $91 million in 1985 from $103 million in 1984, but were ahead of the $88 million estimate for 1983. The decrease resulted mainly from Brazil and Columbia reducing their imports of wheat and barley respectively. Of note however, is that vegetable oil exports increased from $2 million in 1984 to over $6 million in 1985.

CENTRAL AMERICA AND THE CARIBBEAN

Again in 1985, Mexico did not import Canadian wheat. As well, wheat exports to Cuba declined. This resulted in a total of $56 million of Alberta agricultural exports to this region, down from $68 million in 1984 and $85 million in 1983. Also Mexico purchased $6 million of Alberta canola, down substantially from the previous year, but she continued to import larger quantities of canola oil. Future exports to this region will largely depend on the recovery of these nation's economies, in particular, that of Mexico.

COMMODITY ANALYSIS

The five major export groups of Alberta agricultural commodities in 1985 were wheat, live animals and meat/animal products, canola, canola products (oil, meal, cake) and barley. These five groups accounted for over 92 per cent of the total value of agricultural exports.

WHEAT

Wheat accounted for almost half the value of agricultural exports originating in the province. The major customers for Alberta wheat were the People's Republic of China, U.S.S.R., Brazil, Egypt and Japan. Because of the high percentage of lower grade wheat available in the province in 1985 and China's tendency to import lower grade wheats almost exclusively, China became our most important customer for wheat in 1985, surpassing the Soviet Union.

China accounted for $213 million or 26 per cent of the total export sales of wheat. The other major markets were U.S.S.R. (21%), Brazil (8%), Egypt (7%), and Japan (4%). Other customers of significance are Cuba, United Kingdom and Algeria.

In 1985, over 3.8 million tonnes of wheat were shipped out of the province for a total value of approximately 822 million dollars.

BARLEY

Japan was the largest export market for Alberta barley in 1985 with purchases of over $50 million (340 thousand tonnes) or almost 41 per cent of the total barley export market. Other major

markets were East Germany (20%), Saudi Arabia (15%), U.S.S.R. (7%), Israel (6%) and U.S.A. (6%).

CANOLA

Japan is the dominant importer of Alberta canola. In 1985 she imported over 541 thousand tonnes valued at over $195 million. This represented 96 per cent of the total export market for canola. Other purchasers of Alberta canola were Mexico (3%), Bangladesh (1%) and Western European countries (minor amounts).

CANOLA OIL, MEAL AND OILCAKE

Principal markets for canola products in 1985 were India (45%), U.S.A. (14%), Hong Kong (7%), Mexico (7%) and Japan (5%). The total value of exports of canola products was estimated to be over $136 million.

LIVESTOCK ANIMALS AND MEAT/ANIMAL PRODUCTS

The U.S.A. continued to be the dominant market for live animals and meats in 1985. 98 per cent of live animal exports and 77 per cent of meat exports were to the U.S.A. While beef and pork exports went almost exclusively to the U.S.A., horse meat exports went almost entirely to Western Europe and Japan. The total value of exports of live animals and meat/animal products from Alberta in 1985 was $285 million.

Because of the drought situation in Alberta over the past 2 years, grain stocks have been depleted. Because grain, and wheat in particular, form a large share of provincial exports, it is to be expected that our export volumes decreased in 1985 in comparison to the previous year. Improved crop conditions in 1986 may help improve export volumes. Whether they increase sufficiently to offset price decreases remains to be seen.

REGIONAL ANALYSIS

In 1985, Asia was the region that imported the largest amount of Alberta agricultural commodities, with purchases of $737 million or 42 per cent of the provincial total. The bulk of these purchases were grains and oilseeds related.

North America (U.S.A., Greenland, St. Pierre-Miq.) imported $346 million or 20 per cent, much of it livestock and meat related.

Eastern Europe was the third largest importing region for Alberta agricultural commodities with purchases of $249 million or 14.3 per cent. The majority of these exports were accounted for by wheat and barley exports to the U.S.S.R. and East Germany.

Africa imported $121 million or 7 per cent, consisting mainly of wheat and wheat flour.

Exports to South America accounted for 5.2 per cent or $91 million and were mainly wheat and canola oil.

Exports to Western Europe accounted for $86 million or 5 per cent consisting mainly of wheat, barley and meat.

The Middle East and Central America purchases $57 million (3.3%) and $56 million (3.2%) respectively. These purchases consisted mainly of wheat and barley to the Middle East and wheat and oilseeds and canola oil to Central America.
